

DEFINE PROBLEM STATEMENT

Project: Sports Hall Booking System

Date: 20 May 2026

Background

Sports facilities in colleges are often booked manually, leading to double bookings, delays, poor visibility of available slots, and difficulty tracking requests. The proposed Sports Hall Booking System developed on ServiceNow automates booking, approval, notifications, and reporting.

Problem Statement

Develop a centralized web application that enables students and staff to reserve sports halls online while allowing administrators to manage halls, time slots, approvals, and reports efficiently.

Objective	Description
Online Booking	Reserve halls anytime
Approval Workflow	Automate approvals using Flow Designer
Availability	Show real-time slot status
Notifications	Email notifications for booking status
Reports	Generate booking reports

Expected Outcome

A secure, transparent and user-friendly ServiceNow application that streamlines sports hall reservations and eliminates manual scheduling conflicts.
