

PROJECT DESIGN PHASE – PART 1

Sports Hall Booking System (ServiceNow)

Duration: 30 May 2026 – 2 June 2026

1. Introduction

This phase defines how the Sports Hall Booking System solves the identified problems through a structured ServiceNow solution.

2. Problem–Solution Fit

Problem	Solution
Manual booking	Online portal
Double booking	Real-time slot validation
Approval delay	Flow Designer
No reports	Dashboards & Reports

3. Proposed Solution

Users log in, search halls, select time slots, submit bookings, receive approvals, and track status. Administrators manage halls, slots, and reports.

4. System Objectives

Automate bookings, prevent conflicts, improve transparency, simplify administration, and generate reports.

5. User Roles

Students reserve halls; Sports Coordinators approve/reject bookings; Administrators manage master data and reporting.

6. Major Modules

Hall Management, Time Slot Management, Booking Management, Approval Workflow, Notifications, Reports.

7. Booking Workflow

Login → View Halls → Select Slot → Submit Booking → Approval → Notification → Booking Confirmation.

8. Solution Architecture

Users access the Service Portal. Requests are processed by ServiceNow application logic and Flow Designer. Data is stored in ServiceNow tables and notifications are sent via email.

9. Advantages

Reduced manual effort, fewer booking conflicts, real-time visibility, secure access, centralized records.

10. Conclusion

The proposed architecture provides a scalable and maintainable foundation for the Sports Hall Booking System.
