

# DEVELOPMENT PHASE – PART 2

## Sports Hall Booking System (ServiceNow)

Duration: 18 June 2026 – 25 June 2026

### 1. Testing Overview

The completed application was validated through functional testing, user acceptance testing, and basic performance verification to ensure reliable booking and approval workflows.

| Test Case            | Expected Result           | Status |
|----------------------|---------------------------|--------|
| User Login           | Login successful          | Pass   |
| View Available Halls | Available halls displayed | Pass   |
| Book Time Slot       | Booking created           | Pass   |
| Approval Workflow    | Booking approved/rejected | Pass   |
| Email Notification   | Notification delivered    | Pass   |
| Reports              | Booking reports generated | Pass   |

### 2. User Acceptance Testing (UAT)

End users verified that booking requests, approvals, notifications, and reports worked according to the project requirements.

### 3. Performance Testing

The application responded quickly for common booking operations and supported multiple records without functional issues.

### 4. Reports & Dashboards

Booking history, hall utilization, and approval status reports were generated using ServiceNow reporting tools.

### 5. Observations

The automated workflow reduced manual effort, eliminated duplicate bookings, and improved booking transparency.

### 6. Conclusion

The application successfully met the functional and non-functional requirements and was ready for final documentation.
